MAGILL & CO. **January 7, 1918** *FARGO, N. D.*

1918 PRICE LIST 1918

In presenting this first issue of our 1918 **Field Seed and Seed Grain** price list, we wish to take the opportunity to thank all our old friends and customers for their past patronage. We continue to grow, and our largely increased facilities enable us to handle the additional volume of business with the same careful attention that has distinguished **"Fargo Seed House Service"** in the past. We therefore welcome new trade connections, as well as increased favors from old customers. We beg to assure both old friends and new that our constant aim shall be to deserve your confidence by maintaining our present high standard of efficiency as to **QUALITY** and **SERVICE.**

Our old customers are well acquainted with our standards of quality and methods of doing business, but to our new and prospective customers we want to say that, since our firm was first organized it has been our one great ambition to promote the interests of Agriculture throughout the Northwest and to offer only such varieties of seeds as we know will do well and are best adapted to your climatic conditions.

We have labored incessantly to help produce and offer to the trade improved varieties of seed grain, grass seeds and seed corn, and we do feel that these new varieties together with the general high standard of quality which we know is represented in every shipment which we make, have been in a large degree reflected in the continued prosperity of the Northwest.

We have been in the seed business for 31 years and have built up our large volume of business through the reputation which follows the furnishing of GOOD SEEDS.

Samples.—We furnish samples of our seed grain and field seeds, free of charge, to prospective buyers on request. When orders are placed from samples please give us approximate date you received the sample; also stock number.

The North Dakota Seed Law is one of the most strict of any in the United States, and as we are located here at Fargo under the very shadow of the **State Control Seed Laboratories,** our stocks are at all times subject to the most rigid inspection and it is our ambition that every shipment be of even higher quality than that prescribed by our **State Pure Seed Law and Department of Federal Control.**

No Warranty.—We exercise extreme care in the filling of all orders, but we give no warranty, expressed or implied, as to quality, description, or productiveness, or any other matter of any seeds we send out, and will in no way be responsible for the crop.

This non-warranty is similar to that used by all seed houses and we recommend that you test seeds on arrival and if they do not meet your requirements return them at once at our expense and we will cheerfully refund your money.

Order Early.—As market conditions are very unsettled this season, and as fancy stocks are going to be hard to replace, we strongly recommend that our customers place their orders early, thereby taking advantage of the low prices which we present in this first issue of our 1918 price list.

Prices Subject to Change.—The prices quoted herein are based on market conditions at the time this list is issued and are subject to change without notice.

We do not alter prices except in extreme cases, but if your list is an old one and you have occasion to presume that prices are either higher or lower, just write us for current list before ordering and we will supply one at once.

Terms of Sale.—Cash must accompany order and should be in the form of money order or bank draft, or currency by registered mail. We will accept postage on remittances of $1.00 or less if you find it more convenient to use this method.

Orders Promptly Filled.—But in case of delay you will be notified by letter explaining cause of such delay and advising when shipment will be made.

If you do not hear from an order sent us, within a reasonable length of time, send us a duplicate stating amount of remittance, and be sure to give your name and full address.

We have again this season procured a supply of **Farmer's Record and Account Books** which are particularly adapted for the use of small farmers wishing to keep records of their year's transactions. The book also contains in addition to many useful bits of information which will prove of value to every farmer, hints to automobile owners regarding care of cars and operation expense. Send for one—they are free.

Send for our booklets on Marquis Wheat, Alfalfa, and Bean Culture in North Dakota; they are free, and may help you to get started right.

Remember we are the largest shippers of Poultry Feeds and Supplies in the Northwest; heavy stocks always on hand for immediate shipment. Ask for special price on ton lots.

HOME GROWN SEED CORN.

After having experienced the past unfavorable season corn growers need hardly be reminded the grave importance of procuring Northern grown seed corn for the 1918 sowing from a source known to be thoroughly reliable. The bulk of our stocks have been grown from seed of our own selection and breeding, and the crops brought to maturity under our personal supervision, after which they were gathered early, kiln dried, graded and tested, and you can depend on these different varieties producing a matured crop of corn next fall if given a reasonable season with proper cultivation.

From the standpoint of a matured crop, the North Dakota seed corn of 1917 was practically a failure, excepting in two counties, due to abnormally early frosts. However, with our increased facilities and improved methods of handling and curing we have succeeded in saving limited quantities of this Home Grown seed.

Our contract crops in eastern Montana were very short this season, due largely to drought, but Rosebud County came to the front with about half a crop of the earlier varieties which are of most excellent quality.

You no doubt have experimented in past seasons with Southern grown seed corn and are perfectly aware of the extra hazard being taken in planting any other than the Northern grown varieties, so to you past experimenters let us appeal again this season that you do not be fooled again by this Southern seed.

It surely looks larger, plumper and brighter than our Home Grown corn, but you know from your own observation that Southern seed cannot be brought to maturity here in the Northwest excepting on most favorable seasons. Why not eliminate the possibility of losing this most valuable of crops by the planting of our Northern grown varieties?

Don't Be Deceived by the claims of Southern and Eastern dealers that our North Dakota corn is not fit for seed.

We have worked on this problem for 20 years and have demonstrated that our Home Grown Corn can be dried artificially so that it makes seed of the strongest vitality every season.

Even with our exceptional facilities we have succeeded in saving for sowing purposes but a small percentage of the corn put through our process of drying, with the result that values will be above normal this season. However, even at the present high values the cost of seed per acre is considerably lower than any small grain crop you can plant and in most cases the returns much larger.

Grading.—The bulk of our Home Grown Seed Corn is grown by us on contract from seed of our own selection.

All corn is first selected at husking time, then a more careful selection is made when the ear corn goes to the driers, and once again when on the way from the driers to the shellers.

In order that the seed corn which is marketed in shelled condition will make an even sowing in the average corn planter, we find it advisable to again run the corn over a grader after shelling, thus eliminating practically all small and irregularly shaped kernels which includes the major portion of the butts and tips.

Testing.—All lots of seed corn are tested for germination even before the drying process commences and we continue these tests at stated intervals up to and including the time of delivery.

Try our **"Fargo Brand"** Seed Corn this year and be convinced. When shelled it comes put up in seamless bags for which we make an extra charge sufficient to cover actual cost.

These prices supercede all others and are subject to change without notice.

NORTHERN GROWN SEED CORN.

Northwestern Dent.—An 85-day Red Dent Corn, with medium kernels and average sized cob. Has a fine leafy stalk, with ears well up from the ground so it can be cut with binder. Grown in Sargent County, N. D.
Shelled, per bushel.....**$10.00**

Northwestern Dent, Improved.—A new variety bred up from Northwestern Dent. Distinctive features being larger ears and taller stalks. Especially recommended for Central North Dakota. Grown in Marshall Co., S. D.
Shelled, per bushel.....**$10.00**

Golden Dent.—The earliest Yellow Dent in the world. Ears grow well up. In demand with feeders for early fall finishing of cattle. Grown in Sargent County, N. D.
Shelled, per bushel.... **$9.00**

Square Deal Dent.—A very early Yellow Dent, heavy yielding variety, which has been grown successfully in North Dakota and Montana for years. A twelve-row variety producing well formed eight-inch ears on a six-foot stalk about three feet from ground, sure to mature on a normal season. Montana grown.
Shelled, per bushel.....**$8.00**

Seamless Bags Extra, 45c Each.

Minnesota No. 13, N. D. Grown.—A Yellow Dent Corn very productive and adapted for all soil conditions. Most attractive well shaped ears of smooth, deep wedge shaped kernels covering small cob from the butt to very tip, thus insuring heavy yield of the choicest grain. Under favorable soil conditions and with proper cultivation stalks grow to height of seven feet and on a normal season the crop will mature in ninety days. Grown in Sargent County.
Shelled, per bushel.....$8.00

North Dakota White Dent.—One of our earliest maturing Dent varieties which is the result of our breeding and selection. Stalks grow on an average of six feet tall, ears well up from ground, deep kernel with small cob which cures in the field more quickly than many other varieties. Grown in Sargent Co.
Shelled, per bushel.....$8.00

Rustler White Dent, Minnesota Grown.—A splendid early white variety which is growing in popularity with Northwestern farmers because of its general adaptability to all soil conditions and heavy yield. Grown in Lyon Co. Shelled, per bushel.....$8.00

Squaw Flint.—Pure white ears from 8 to 10 rows and a long slender cob that is covered with heavy husk which is a great protection against grain damage from early frosts. Very early in maturity and heavy yielder, an abundance of ears being produced close to ground which makes this variety very popular with stockmen for hogging off. Grown in Burleigh Co., N. D.
Shelled, per bushel.....$7.00

North Dakota White Flint.—Closely resembles the White Squaw variety in appearance and yield but produces a much taller growth of fodder and ears are well up from ground so that crop can be cut with binder. With proper cultivation matures in 80 days. Grown in Burleigh Co., N. D.
Shelled, per bushel.....$7.00

Gehu Flint.—One of the earliest and most popular varieties of Flint grown. Ears are light yellow in color. With proper cultivation produces stalks six feet in height. Will mature on a normal season in 80 days and yields of 60 bushels per acre are not uncommon. Grown in Burleigh Co., N. D.
Shelled, per bushel.....$7.00

ALL PRICES F. O. B. FARGO OR MOORHEAD

Mixed Squaw Flint.—This is from the old original stocks which the first settlers here in the Northwest found was being successfully grown by the Indians. The grain is of many colors, stalks short and ears grow close to ground; sure to get ripe every season. Grown in Burleigh County, N. D.
Shelled, per bushel.....$6.00

Pop Corn—White Rice—Choicest of rice shaped pearly white kernels, the most satisfactory of our early maturing, heavy yielding varieties for Northwestern conditions.
Per bushel.....$8.00

FODDER CORN—ALL SOUTHERN GROWN.

The sowing of fodder corn has become almost universal as it provides an excellent forage crop, producing more tons of feed per acre than any other grain or grass. Can be sown late in the season when other forage crops are a failure. The varieties which we offer below are especially adapted for Northwestern conditions. Our present stock has been carefully selected, cured and tested, resulting in the choicest of quality and strong germination. Order early if you want some of this extra choice seed.

Mammoth Yellow Dent Fodder.—Makes heavy tonnage of excellent quality fodder—high in food value, as soft ears are formed and stalks become well cured.
Per bushel.....$3.00

Mammoth White Dent Fodder.—Produces results similar to the yellow fodder variety, very leafy and easy to harvest.
Per bushel.....$3.00

Sweet Fodder Corn.—Produces abundance of choice quality fodder which is high in sugar content, of special value for feeding to dairy stock. Per bu. of 45-lbs.....$4.00

Sugar Cane.—Makes one of the very best crops of fodder when drilled with ordinary grain drill at rate of 50 lbs. to acre; produces sweet, tender fodder, which is of high food value for cattle, horses and hogs, either as roughage or silage. Every Northwestern farmer should grow some as it is a great drought resister.
Per bushel of 50 lbs.....$4.00

Kaffir Corn.—Is constantly growing in favor with our Northern farmers. When drilled in rows produces abundance of hay from 5 to 6 feet in height with broad leaves. Easily grown and makes one of the best fodders for horses and cattle when harvested just as it begins to tassel. Per bushel of 50 lbs.....$3.00

Seamless Bags Extra, 45c Each.

Sudan Grass.—A new annual forage crop of immense value to the West. It resembles Sugar Cane, but grows a finer stalk, and reaches a height of 7 to 9 feet. Sow 4 to 6 pounds of seed per acre in rows 18 to 24 inches apart, or drill 15 pounds per acre. One of our best drought resisting forage crops—heaviest yielding of any hay crops as it can be harvested from two to three times per season. Per pound.....$0.20

SEED GRAIN.

Blue Stem Wheat, Minn. No. 169.—Plump, heavy weight. Per bushel.....$2.50

Marquis Wheat.—A new variety of hard spring wheat which was originated by Dr. Saunders of the Central Experiment Station at Ottawa by crossing the Red Fife with acclimated Calcutta Red, thereby combining the early maturing features of the former and exceptional qualities and appearance of the latter. The seed which we are offering is from the original stock imported from the Canadian Northwest, beardless, heavy yielding, weighing over 60 lbs. per bushel, earliest maturing variety of hard wheat known. Per bushel.....$2.50

Velvet Chaff Wheat.—A very early, large yielding variety of bearded wheat, weighing 60 lbs. per bushel. It ripens one week earlier than Fife or Blue Stem and is harvested and out of the way of rust and hot weather which so often injures the other varieties. Per bushel.....$2.50

Arnautka Durum Wheat.—Drought resisting, not as easily affected by rust as other varieties. Choice selected seed. Per bushel.....$2.50

60-Day Oats.—The very earliest oat we have been able to produce. Sow early for best results. Per bushel.....$1.00

Swedish Select Oats.—A new, very popular, early variety, heavy yielder under all soil conditions. Per bushel.....$1.00

White Russian Oats.—A late side oat, very free from rust. Per bushel.....$0.95

Big Four Oats.—Heavy branching, good yielder. Per bushel.....$0.95

Silver Mine Oats.—Early, heavy yielding. Per bushel.....$0.95

ALL PRICES F. O. B. FARGO OR MOORHEAD

Early July Oats.—A winter variety brought to the Northwest from south of the Mason and Dixon line, which has been grown here in Cass County, North Dakota, in a small way, for three seasons past. By sowing very early in the spring they ripen even ahead of the 60-day variety and the earlier sorts of barley, so are of high value as a harvest feed. Heavy yielding—early spring frosts do not injure the young plants. Per bu.....$1.50

Oderbrucker Barley.—A new extra choice brewing barley, perfectly pure, six row, stiff straw, very heavy yielder. Per bushel.....$1.75

Manshury Barley.—Choice, bright, heavy yielding, six row barley. Per bushel.....$1.70

Wisconsin No. 5 Barley.—Best 6-row barley produced at Wisconsin Experiment Station. Noted for its plumpness and uniformity of grain, stiffness of straw and vigorous growth. Per bushel.....$1.75

Chevalier 2 Row Barley.—Heavy yielding variety which is growing in popularity here in the Northwest as it is very hardy and consistently outyields—even on dry seasons —many of the other sorts. Usually demands a market premium as the grain is plump, heavy and bright. Our supply this season is Montana grown and of very choice quality. Per bushel.....$1.75

Success Beardless Barley.—One of the earliest maturing varieties which is to be commended because of its hardiness, heavy yield and exceptional value as a forage crop for hogs. As it produces no beards the straw is of high value as a cattle feed. Per bushel.....$1.80

Hulless Barley.—This variety of barley is very popular with stockmen. Weighs 60 pounds per measured bushel and is an enormous yielder; straw makes excellent hay. Per bushel.....$2.00

Primost Flax No. 25.—One of the best varieties produced by Minn. Exp. Station and is pronounced by this same authority as the heaviest yielding variety which they have been able to produce. Per bushel.....$4.25

Pure Russian Flax.—Choice seed raised on new land. Per bushel.....$4.00

North Dakota Resistant No. 52 Flax.—This variety was bred up by Prof. H. L. Bolley of the N. D. Experiment Station for a Wilt Resistant variety. He commenced work on it in 1900 and first put the seed in farmers' hands in small quantities, in 1908. This is the seventh year we have been able to secure any of it to offer to our customers and the supply is limited. Per bushel.....$4.50

Seamless Bags Extra, 45c Each.

Speltz.—Farmers in the Northwest cannot afford to be without it. It produces a good yield under adverse circumstances, where other crops would fail. It will stand more dry weather than any other grain crop, as it is a great drought resister. It produces more food value per acre than any other of our grains and is a most valuable feed for all kinds of stock. The plant is almost entirely free from rust and smut and does not lodge. Per bushel.....$1.40

Spring Rye.—North Dakota grown stock of good quality which is sure to produce a crop even on old worn-out light soil where you cannot expect other small grains to flourish. Per bushel.....$2.40

Winter Rye.—Makes excellent pasture if sown in spring. Per bushel.....$2.00

Buckwheat.—Can be seeded very late and is of great value as a catch crop as it is often sowed in July; highly recommended to turn under when green; it smothers weeds and is fine for fertilizer. Per bushel of 42 lbs.....$2.00

Hog Pasture Mixture.—This mixture is made after a formula furnished by Government Experiment Station; produces abundance of highly nutritious pasture. Per 100 lbs.....$7.00

Dwarf Essex Rape.—Furnishes an immense amount of green feed, and its nutritive value is nearly twice that of clover. It may be sown any time from early spring until late in summer, with grain or alone. From 5 to 10 lbs. of seed per acre is sufficient. less if sown with grain. We buy in car lots and handle only the best and purest Dwarf Essex, entirely free from bird rape, mustard, or other noxious weed seeds. The Dwarf Essex is the only desirable variety. Per 100 lbs.....$12.00

Canada Field Peas.—Make excellent feed for horses, sheep, hogs and milch cows; equal to corn and a month earlier in maturity. Sow either alone or with oats or barley. Per bushel.....$4.50

Canary Seed.—A valuable forage plant producing heavy tonnage per acre in the dry sub-arid districts of the Northwest, also a heavy seed producer. Stock grown in western North Dakota. Try it on a field which you are sure will produce nothing else. Per 100 lbs.....$8.00

Winter Vetch.—Is one of our most valuable legumes which brings an immense amount of fertility to the soil and provides fine pasturage. Per 100 lbs.....$22.00

White Navy Beans.—Choice hand-picked straight variety stock grown in North Dakota. Per bushel.....$11.00

ALL PRICES F. O. B. FARGO OR MOORHEAD

GRASS SEED.

Bromus Inermis.—The great drought resisting grass for both hay and pasture. Choice seed which we recommend as quack free. Per 100 lbs., sacked.....$17.00

Slender Wheat Grass.—(Often called Western Rye Grass). Affords excellent pasture and provides large quantities of hay; will thrive under very dry conditions on light soil; also thrives in alkali soil where other grasses fail. Per 100 lbs., sacked.....$17.00

Timothy.—Choice North Dakota grown. Per 100 lbs.....$7.50

Timothy and Red Clover Mixed.—Choice Minnesota grown with sprinkling of Red Clover, just as grown together. Per 100 lbs...$8.50

Timothy and Alsyke Clover Mixed.— Per 100 lbs.....$8.50

Blue Grass.—Choice Kentucky, per 100 lbs...$25.00

Red Top.—Solid. good for low lands. Per 100 lbs.....$15.00

Orchard Grass.—Good for shade. Per 100 lbs.....$30.00

Meadow Fescue.—One of the best known of our natural or permanent meadow grasses. This stock is North Dakota grown. Per 100 lbs.....$21.00

Lawn Grass Mixture.—Our Fargo Brand mixture contains the choicest varieties which are particularly adapted to our Northern climatic conditions. Per 100 lbs.....$35.00

Medium Red Clover, North Dakota Grown. This is a choice hardy lot of heavy dark colored clover grown in Cass County, which we recommend most highly for sowing here in North Dakota. Per 100 lbs.....$26.00

Mammoth Red Clover.—Minnesota grown. Per 100 lbs.....$26.00

Alsyke Clover.—Minnesota grown. Per 100 lbs.....$26.00

White Dutch Clover.—Per 100 lbs.....$55.00

Sweet Clover.—(White Flowering Biennial) A valuable plant for both hay and pasture, also of high value as soiling crop.

Per 100 lbs.....$26.00

Per 100 lbs., Scarified.....$28.00

Yellow Flowering Biennial—

Per 100 lbs.....$24.00

Per 100 lbs., Scarified.....$26.00

Seamless Bags Extra, 45c Each.

FARGO BRAND FANCY ALFALFA.

Alfalfa is rapidly becoming a necessary crop to every Northern farmer, and the production of seed here in the Northwest is increasing rapidly, as it is a recognized fact by all authorities that this Northern grown stock is preferable to that grown in the south central states or in Europe.

Alfalfa.—Montana Liscomb variety. Grown on non-irrigated land from some of the oldest and best established fields in the state. High in purity and stock which we can recommend to our trade. Per 100 lbs.....$25.00

Alfalfa.—American grown, in either Nebraska or Wyoming. Shows strong germination and high purity. Some of the best fields in the Northwest have originated from this stock. Per 100 lbs.....$22.50

Alfalfa.—South Dakota. Grown out in the Black Hills district under dry farming conditions on old fields which have withstood many winters, so we can recommend this stock as being perfectly hardy and of highest purity. Per 100 lbs.....$23.00

Alfalfa, Grimm.—Characterized by spreading roots instead of one main tap root; it also has a much wider crown than other varieties and is noted for its heavy stooling tendency. On account of the peculiar root formation it efficiently withstands winter killing. Per 100 lbs.....$33.00

Alfalfa, Baltic.—One of the hardiest of our new varieties. Stock is grown in western South Dakota. Per 100 lbs.....$30.00

Turkestan Alfalfa.—A variety of Alfalfa which is imported. Per 100 lbs.....$21.00

SCARIFIED CLOVER AND ALFALFA SEED.

We have recently installed a scarifying machine for the treatment of Clover and Alfalfa seed containing a high percentage of what is known as "hard seed." The function of this machine is to crack and scratch the hard shell of the seed, thus enabling it to more readily absorb moisture and grow the first season.

Seed tested by this process shows almost a perfect germination, and is supplied at $2.00 per 100 lbs. over and above the foregoing prices.

Nitragin.—For Clover and Alfalfa inoculation. First quality nitrogen-fixing bacteria which makes positive a good catch the first season. Write for special circular. Costs
One-acre package.....$1.00
Five-acre package.....$4.00
Ten-acre package.....$7.50

ALL PRICES F. O. B. FARGO OR MOORHEAD

MILLET.

Millets of all varieties should be sown in North Dakota after June 1st, for best results.

German Millet.—Home grown. Per 100 lbs...$4.50
German Millet.—Southern. Per 100 lbs.....$5.00
Siberian Millet.—Home grown. Per 100 lbs...$5.50
Siberian Millet.—Southern. Per 100 lbs.....$6.00

WHITE WONDER MILLET.

A new variety which is rapidly growing popular here in the Northwest, distinctive features being its early maturity, heavy leafy foliage, thus producing immense amount of desirable fodder which is easily cured. Its dense growth makes it possible for this crop to easily conquer all noxious weed seeds.
Per 100 lbs.....$6.00

Early Fortune Millet.—Home grown.
Per 100 lbs.....$4.50

Hog Millet.—Home grown. Per 100 lbs.....$4.50

Japanese Millet or Billion Dollar Grass.—Grows very rank and produces an immense yield of coarse hay. Per 100 lbs.....$6.00

POTATOES.

Early Ohio Potatoes.—Pure stock. Hand sorted. Per 100 lbs.....$2.50

Early Six Weeks Potatoes.—A very choice variety, much like the Early Ohio but earlier and more productive. Per 100 lbs.....$2.65

Rural New Yorker.—One of our heaviest yielding white varieties. Per 100 lbs.....$2.50

PARIS GREEN—ANSBACHER BRAND.

This brand of green needs no introduction to potato growers of the Northwest, being one of the oldest and best known brands on the market. We have a supply in both bulk and package lots. **Ask for Prices.**

Arsenate of Lead.—One of the most powerful insecticides which is increasing in popularity with potato growers; furnished in powder form, to be used as spray.

1-lb. package.....$0.55
5-lb. package.....$2.50
10-lb. package.....$4.80
20-lb. package.....$8.80
50-lb. package.....$20.00

Seamless Bags Extra, 45c Each.
